FLUID MILK AND CREAM REPORT
JANUARY 1962

U. S. DEPT. OF AGRICULTURE
LIBRARY

FEB 23 1962

CURRENT SERIAL RECORDS

January 18, 1962

SUMMARY

Milk for fluid use prices in about 160 markets showed a generally downward trend in early January at producer levels but were mixed at consumer levels, the Crop Reporting Board reports. Dealers' buying prices declined in 39 markets or 1 in about every 4; prices advanced in 13. Single quarts delivered to homes were higher in 8 markets but lower in 6. Store-sold quarts decreased in 10 markets but increased in 7. Half-gallons out-of-stores advanced in 9 markets but declined in 8. Gallon jug prices were higher in 6 markets and lower in 6.

Early January fluid milk prices averaged \$5.49 per hundredweight -- 5 cents below a month earlier and 12 cents under January 1961. By regions, prices were unchanged from December in 4 regions but declined in 4 regions. Prices advanced 4 cents in the East South Central Region. The declines ranged from 2 cents in both the West North Central and South Atlantic Regions to 22 cents in New England. Regional average prices in January were below those of a year ago, the decreases ranging from 3 cents in the Pacific Coast States to 34 cents in the West South Central. Other sizable downward differences from last year were 23 cents per hundredweight in the Mountain States and 22 cents in both the New England and West North Central Regions.

Early January home delivery milk prices in 25 major cities averaged 27.0 cents per single quart. This is unchanged from December but three-tenths of a cent above January a year ago. Compared with the 1956-60 average for the month, the average this month was 1.8 cents higher. Single quart price advance from December was 1 cent at Kansas City. Declines of one-half cent per quart at Boston and 1 cent at Philadelphia were reported.

Average daily sales of whole milk (preliminary) during November in 65 Federal Order and 6 State marketing areas were about the same as both October 1961 and November 1960. October skim milk sales in 71 markets were 3 percent less than September but were 8 percent more than October 1960. Average daily sales of milk and cream mixtures (half-and-half) in 66 areas during October were 1 percent lower than September and 3 percent under October a year earlier. Sales of fluid cream for October were 1 percent below September and 2 percent less than October a year ago. All fluid product sales (average daily) in 70 markets in October declined 2 percent from September but were unchanged from October 1960. Receipts from producers in 76 Federal Order and 5 State marketing areas, on an average daily basis for November, were 6 percent higher than a year earlier. Per producer, receipts were 9 percent greater than November a year ago.

PRICES IN FLUID MILK MARKETS, JANUARY 1962

In New England, dealers' buying prices of Class I milk in early January averaged \$6.02 per hundredweight - 22 cents under both December and January last year. In the New Hampshire markets reporting, Class I prices were 22 cents per hundredweight below December; selling prices were $\frac{1}{2}$ cent per quart lower. Burlington, Vt. reported a 1-cent increase in home delivery prices with store prices unchanged. Producer prices in this market are not currently determined. Class I prices in Southern New England markets were 22 cents per hundredweight less than December. Home and store prices were generally $\frac{1}{2}$ cent lower. However, home and store prices in Hartford and New Haven, Conn. were unchanged and gallons in Springfield and Worcester, Mass. were up slightly.

Class I prices for milk in the Middle Atlantic States averaged \$6.15 per hundredweight in early January - down 12 cents from December and 10 cents from January 1961. In the New York - New Jersey marketing area, Class I prices were 9 cents per hundredweight below December. Selling prices were generally unchanged from a month ago. However, at Binghamton, New York the range of prices for quarts out-of-stores was narrowed and half-gallons sold steady to 2 cents higher. Philadelphia prices were lower by 40 cents per hundredweight for Class I milk and 1 cent per quart at homes and stores.

Milk for fluid use in the East North Central States in early January averaged \$4.65 per hundredweight -- unchanged from December but 8 cents less than January last year. In the Ohio markets reporting, Class I and single quart prices were generally unchanged (most are now currently determined.) Akron and Canton showed a $\frac{1}{2}$ cent per quart decline in gallon jugs. Cincinnati had a sizable increase in half-gallon prices while there was a small decline for this unit in Cleveland and Dayton. Toledo reported some adjustment in home and store quart prices. At Evansville, Ind., Class I and most other prices were unchanged. Single quarts at homes and stores were 1 cent above December. Springfield, Ill. reported unchanged fluid use prices and most other prices but a 2-cent increase in store quarts and as much as a 7 cent drop in half-gallons out-of-stores. Class I and home delivery prices in Milwaukee, Wis., were unchanged but store prices showed small upward adjustments.

Fluid use prices in the West North Central Region in early January averaged \$4.29 per hundredweight. This is a 2-cent reduction from a month earlier and a 22 cent drop from January last year. Store prices at Duluth, Minnesota were unsettled as the price war continues. Other prices were unchanged. In the Greater Kansas City market, Class I prices were unchanged but home and store prices advanced generally 1 cent per quart on all units. However, in Kansas City, Kansas, some stores sold quarts 2 cents lower and half-gallons from 2 cents lower to 2 cents higher. Class I prices were unchanged in Lincoln, Neb. but the home and store prices reported were 1 cent per quart higher.

Prices for Class I milk in the South Atlantic States averaged \$6.01 per hundredweight in early January - 2 cents below December and 6 cents under January last year. Class I prices at Wilmington, Del. were 40 cents per hundredweight lower but home and store prices were unchanged. At Miami, Florida, dealers' buying prices for fluid use milk were 12 cents per hundredweight less than December but prices for home delivery and store-take-out-were unchanged.

In the East South Central Region, milk for fluid use prices in early January averaged \$5.36 per hundredweight. This is 4 cents above December but 15 cents below January 1961. Dealers' buying prices advanced 16 cents per hundredweight at Lexington and Louisville, Kentucky. In these markets consumer prices held at December levels. At Paducah, Kentucky, Class I and home and store quart prices were unchanged. Half-gallons sold-in-stores were down 2 cents.

Class I milk prices in the West South Central Region in early January averaged \$5.44 per hundredweight - unchanged from December but 34 cents below January 1961. At El Paso, Texas, Class I prices were 20 cents lower but no changes were reported in home or store prices. At Galveston, Texas, gallon jug prices advanced 4 cents but no changes were reported for other prices. Class I and home delivery prices in Houston, Texas were unchanged. Store quarts were 1 cent lower but the range of half-gallon prices narrowed.

In the Mountain States, dealers' buying prices in early January averaged \$5.35 per hundredweight. This is unchanged from a month earlier but 23 cents below January 1961. Stores sold quarts 1 cent lower at Pueblo, Colorado. Prices of other units on home delivery routes and at stores were unchanged. After the end of the price war in Phoenix, Arizona, Class I prices were unchanged but half-gallons in stores advanced 5 to 13 cents per unit. Other selling prices were reported the same as December.

The average price paid by dealers for early January fluid use milk in the Pacific States was \$5.45 per hundredweight -- unchanged from December but 3 cents under January a year ago. No important changes in market prices from December levels were reported.

Omaha, Nebr.....	22.0	24	24	24	25 cities average..	25.1	26.6	26.9	26.9

a. "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised.

S- From State sources. D.R.- Payment in direct ratio to milkfat. PA- Producers' association prices. a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. h. Gallon jug milk \$6.125 D.R. at basic test. k. Average of blend prices paid by all plants in the State. m. Includes special premium.

p. Negotiated at basic test: Nov. Class I \$5.45, blend \$4.83 at Oklahoma City; Class I \$5.50, blend \$4.73 at Tulsa. q. Class I \$5.55, blend \$4.99 at Ardmore and Lawton. r. Stark Co. assn. blend \$4.40. s. \$4.22 - Muskegon prod; \$4.27 - Holland prod; temporary adjustment because of assn. pool arrangements. t. Mississippi Milk Commission minimum price. u. Includes 9¢ from earnings. v. The following changes have been made for fall production fund: Added: Columbus 43¢; Dayton-Springfield 39¢; Cincinnati 37¢; Ft. Wayne 28¢; Indianapolis 39¢; Suburban St. Louis 16¢; Sioux City 38¢; Nebraska-Western Iowa 35¢; St. Louis 16¢; Ozarks 15¢; Louisville-Lexington 47¢. w. Weighted average of area pools.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, OCTOBER - NOVEMBER 1961

Sales of whole milk in November about the same as in 1960

Whole milk product sales (preliminary) in 65 Federal Order and 6 State marketing areas during November, at 70.6 million pounds per day, were about the same as both October 1961 and November 1960. The comparisons this month do not include sales in the important New York portion of the New York-New Jersey marketing area. Because of complications in delivery patterns in connection with the settlement of the New York City milk wagon drivers' strike in early November, the data are not available at this time. It is expected that by this time next month data for whole milk sales of all months through December will be available. The average milkfat test of sales in October for 65 of these areas was 3.56 percent as compared with 3.58 in October 1960.

Skim milk sales up 8 percent from October 1960

Average daily sales of skim milk items in 65 Federal Order and 6 State marketing areas in October were down 3 percent from September but were up 8 percent from October 1960. For the first ten months of 1961, sales advanced 8 percent. For comparison between September and October sales, the fact that September had 4 Sundays and October 5 should be pointed out since many dairies and stores do not make sales on Sundays. There were 5 Sundays in October 1960. For October only 3 of the market groupings, Philadelphia, Wilmington and Oklahoma Metropolitan, showed lower sales than a year earlier. However, sales were 20 percent or more higher in 8 of the groups. The average milkfat test of sales in October, at 1.13 percent were up slightly from 1.10 percent in October 1960.

October milk and cream mixture sales down 3 percent

In 60 Federal Order and 6 State marketing areas, October sales of milk and cream mixtures (half-and-half in most markets) on an average daily basis were down 1 percent from September and 3 percent from October 1960. Cumulative sales for the months of 1961 through October were about 2 percent less than the corresponding period of the year before. Combined sales during October in the Chicago, Southern Michigan and California marketing areas, which represent slightly more than one-half of the sales reported, were 2 percent below September and 5 percent below October 1960. Sales for the remaining areas were nearly unchanged from both September 1961 and October 1960.

Fluid cream sales in October down 2 percent

October sales of fluid cream in 61 Federal and 6 State marketing areas declined 1 percent from September and were below October 1960 by 2 percent. Sales were lower than October a year earlier in 23 of the 42 market groupings, with 8 groups having losses of 10 percent or more. Sales were about the same as October a year ago in 3 markets but higher in 16. Through October, cream sales in 1961 were 2 percent below the same period a year earlier. The milkfat test of sales of fluid cream averaged 23.1 percent in October compared with 22.9 percent in September and 23.0 percent in October 1960.

(Continued on page 27)

a. Quantities include mixtures of milk and cream (excluding eggnog) sold in defined marketing areas (Federal areas adjusted for comparability where necessary); data are revised for earliest date shown, preliminary for others. See page 27 for markets combined. S- Data from State sources. b. Military sales excluded. d. Computed from unrounded data. Average fat test for 64 areas; markets included in totals only if fat test reported for all comparisons.

Compiled from reports of Market Administrators and State milk control agencies.

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
c. Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.
e. Estimated. r. October 1960 receipts per producer revised: North Carolina - 697; 81 market total - 627.
Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Tennessee - Chattanooga, Knoxville, Memphis and Nashville; Mississippi - Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; and Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

Total sales of all fluid products unchanged from a year ago

Total fluid product sales of fluid milk in October in 64 Federal Order and 6 State marketing areas (average daily) were down 2 percent from September but were about the same as in October 1960. Of the 44 market groupings, 25 reported October sales higher than a year earlier. Sales were about the same in 4 groups but lower in 15. Cumulative sales through October 1961 were unchanged from the corresponding period of 1960. Fat test of sales in October averaged 3.66 percent compared with 3.64 percent in September and 3.69 percent in October a year ago.

Producer receipts for November increase 6 percent

Receipts from producers in 76 Federal Order and 5 State marketing areas during November (average daily basis) were 6 percent above November 1960. Receipts per producer, at 689 pounds per day in November, were 9 percent greater than a year earlier. The average milkfat test of receipts during October was 3.82 percent, unchanged from that month in 1960.

December milk production 3 percent above 1960

Milk output in the United States in December, estimated at 9.7 billion pounds, was 6 percent above November and 3 percent more than in December 1960. This was 11 percent larger than the 1950-59 average for the month. Per capita production in December was equivalent to 1.71 pounds per day, compared with 1.69 pounds a year earlier. Based on preliminary monthly estimates, production in 1961 totaled 124.9 billion pounds - slightly above the previous record high set in 1956. Also in 1961, monthly production records were set in January, March and September through December.

FLUID MILK AND CREAM REPORT
FEBRUARY 1962

U. S. DEPT. OF AGRICULTURE
LIBRARY
FEB 27 1962
CURRENT SERIAL RECORDS

February 16, 1962

SUMMARY

Prices of milk for fluid use in early February made few changes from January, the Crop Reporting Board reports. Class I prices were more than 11 cents higher in only 3 markets but in no market reported did fluid use prices decline as much as 11 cents per hundredweight. Declines, however, slightly more than offset advances. Home delivery single quart prices were higher in 2 markets but lower in 3. Store prices were higher in 1 market for single quarts, 4 markets for half-gallons and 1 market for gallons. Lower consumer prices as reported were: quarts, 6 markets; half-gallons, 3 markets; and gallons, 2 markets. Class I prices in a number of markets are not currently reported but will be shown next month.

Dealers' buying prices for fluid milk in about 160 markets in early February averaged \$5.48 per hundredweight -- down 1 cent from January and 8 cents from February 1961. Prices averaged slightly lower than January in 5 regions. Prices were unchanged in 3 regions but higher in 1. Average prices were lower than February last year in all regions and these ranged from 1 cent per hundredweight in the East North Central to 27 cents in the West South Central. Other important decreases were: 24 cents in the Mountain States; 22 cents in New England; 18 cents in the West North Central; and 15 cents in the East South Central States.

Home delivery prices per single quart for the most common grade of whole milk in 25 major cities in February averaged 27.0 cents per quart. This is unchanged from January but one-tenth cent above February last year. Compared with the 1956-60 average, the price this month was 1.6 cents higher. No changes for this month in any of the 25 markets were reported.

Whole milk sales in 66 Federal Order and 6 State marketing areas in December (preliminary basis) averaged 78.4 million pounds per day -- 3 percent less than both the previous month and December 1960. Skim milk item sales in 71 areas during November were 1 percent below October but 8 percent above November 1960. Average daily sales of milk and cream mixtures (half-and-half) in 66 markets during November were 3 percent higher than October but 2 percent lower than November 1960. Fluid cream sales on an average daily basis in 67 marketing areas in November advanced 20 percent from October but were unchanged from November 1960. Sales of all fluid products in 70 areas (average daily) during November were slightly higher than both October 1961 and November 1960. Producer receipts on an average daily basis in 76 Federal Order and 5 State marketing areas during December were 7 percent above a year earlier. Receipts per producer averaged 715 pounds during December -- 10 percent over the corresponding month a year ago.

PRICES IN FLUID MILK MARKETS, FEBRUARY 1962

Average Class I milk prices in New England at \$6.02 per hundredweight in early February were unchanged from a month ago, but 22 cents below February 1961. The only important consumer price change reported for the region was at Burlington, Vt., where home and store prices were 1 cent per quart lower.

Dealers' buying prices for fluid use milk in the Middle Atlantic States averaged \$6.10 per hundredweight in early February. This is a decrease of 4 cents from January and is 6 cents below February last year. No important changes in home and store prices for the region were reported.

In the East North Central Region, dealers paid an average of \$4.65 per hundredweight for fluid use milk in early February, unchanged from the month before but 1 cent less than February 1961. At Columbus, Ohio, Class I prices and most other prices were unchanged but gallon jug prices were as much as 23 cents lower as some stores featured this unit at 49 cents. Class I prices at Evansville, Ind., were unchanged but resale home and store prices were reduced 1 cent per quart for all units. Springfield, Ill., fluid use prices were down 10 cents per hundredweight. Home delivery prices were unchanged but store quarts were as much as 5 cents lower and half-gallons 2 cents above January in some stores in this market. The price war in Grand Rapids, Mich., which has been in effect since November, has moderated somewhat. Single quarts delivered to homes advanced 2 to 3 cents; store sold quarts moved up 1 cent; and half-gallons sold in stores were quoted 1 to 4 cents higher. Class I prices are not currently reported.

West North Central prices of milk for fluid use averaged \$4.30 per hundredweight in early February. This is a gain of 1 cent from January, but a loss of 18 cents from February 1961. At Burlington, Ia., dealer buying and home delivery prices were unchanged. Some stores were selling quarts 1 cent lower and in some instances half-gallons 3 cents below January. Class I prices in the Greater Kansas City area advanced 19 cents per hundredweight but home and store prices remained at January levels. Class I prices at Lincoln, Nebr., were unchanged from the previous month. Single quarts both on routes and at stores dropped 1 cent.

Class I milk prices in the South Atlantic Region averaged \$6.01 per hundredweight. This is unchanged from January, but 5 cents below February a year ago. At Miami, Florida, Class I and store prices were unchanged but home delivery prices advanced 1 cent per quart.

Early February milk for fluid use prices in the East South Central States averaged \$5.35 per hundredweight -- unchanged from the January price and down 15 cents from February a year ago. Consumer prices in the region were reported unchanged from January in most markets.

Milk for fluid purposes in the West South Central Region averaged \$5.51 per hundredweight -- lower by 1 cent from January and 27 cents from February 1961. Class I and single quart home and store prices at Fort Smith, Ark., were unchanged. However, a price war developed on half-gallons as this unit was selling 6 cents below January. Class I and prices of quarts sold in homes and stores were unchanged at Little Rock, Ark. Half-gallon prices advanced from 1 to 3 cents, however. At Oklahoma City, quart and half-gallon prices were reported at the same level as January but gallon jug prices advanced 2 cents as other consumer units held steady. The prices resulting from Class I price negotiations for this marketing area have not been reported. Class I and most consumer unit prices were unchanged at Galveston, Texas, but gallon jugs were reduced by 4 cents per unit.

Dealers' buying prices in the Mountain States averaged \$5.34 in early February. This is a reduction of 1 cent from January and is 24 cents below February 1961. A downward adjustment of 4 cents per hundredweight was made in Class I prices at Phoenix, Ariz. Home and store quarts were the same as last month but half-gallons at stores dropped 15 cents.

Class I prices on the Pacific Coast averaged \$5.44 cents per hundredweight -- 1 cent under January and 4 cents below February 1961. Dealers' buying prices were unchanged at Everett, Wash., as were single quarts delivered to homes. However, at stores, quarts were selling 1 cent lower and half-gallons were off from $\frac{1}{2}$ to 2 cents.

Omaha, Nebr.....	22.0	24	24	24	25 cities average.	25.4	26.9	27.0	27.0

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

S- From State sources. D.R.- Payment in direct ratio to milkfat. PA- Producers' association prices.
a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. h. Gallon jug milk \$6.125 D.R. at basic test. k. Average of blend prices paid by all plants in the State. m. \$5.70 Shreveport; \$6.05 Ruston, Monroe & Bastrop. n. Negotiated at basic test: Dec. Class I \$5.07, blend \$4.52 at Oklahoma City; Class I \$4.99, blend \$4.40 at Tulsa. p. Class I \$5.12, blend \$4.59 at Ardmore and Lawton. q. November blend \$5.62 at Charleston. r. \$4.17 - Muskegon prod.; \$4.19 - Holland prod.; temporary adjustment because of assn. pool arrangements. s. Mississippi Milk Commission minimum price. t. Includes 8¢ from earnings. u. The following changes have been made for fall production fund: Added: Columbus 27¢; Dayton-Springfield 25¢; Cincinnati 35¢; Indianapolis 39¢; Sub. St. Louis 14¢; St. Louis and Ozarks 16¢; Louisville-Lexington 44¢. v. Weighted average of area pools. w. Blend \$5.03 for November at Chattanooga. x. Louisiana Milk Commission minimum price.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, NOVEMBER-DECEMBER 1961

December whole milk sales down 3 percent

Sales of whole milk in 66 Federal Order and 6 State marketing areas in December were 78.4 million pounds per day (preliminary data). This was 3 percent less than both the previous month and December 1960. December 1961 had 5 Sundays in comparison with only 4 Sundays in both November 1961 and December 1960. Sales on many home delivery routes and in many stores are not made on Sunday. Cumulative sales through the first 11 months of 1961 were 1 percent less than for the same period a year earlier. Whole milk fat tests for November 1961 averaged 3.57 percent compared with 3.58 percent in November the year before.

November sales of skim milk 8 percent above a year earlier

Skim milk item sales (average daily basis) in 71 marketing areas during November were 1 percent below October but 8 percent above November 1960. Markets and market groupings where skim milk sales were at least 25 percent above November 1960 were the two South Dakota markets, Wilmington, Del., Central Arizona, and Inland Empire, Ida. - Wash. Through November, cumulative sales for 1961 were up 8 percent from a year earlier. The milkfat test of sales in November averaged 1.14 percent compared with 1.11 percent in November 1960.

Sales of milk and cream mixtures down 2 percent from November 1960

Average daily sales of milk and cream mixtures (half-and-half in most markets) in 66 markets during November were 3 percent higher than October but 2 percent lower than in November 1960. Cumulative sales for January - November were 2 percent below that period of 1960.

November fluid cream sales unchanged from previous year

Sales of fluid cream on an average daily basis in 67 marketing areas in November advanced 20 percent from October but were unchanged from November 1960. The eleven-month total of cream sales for 1961 was 2 percent short of sales during the corresponding period the year before.

Total fluid sales in November fractionally higher than in 1960

Sales of all fluid products in 70 areas (average daily) during November were a fraction of a percent higher than both October 1961 and November 1960. Cumulative sales through November 1961 were about the same as the corresponding period the previous year.

(Continued on page 27)

a. Quantities include mixtures of milk and cream (excluding eggnog) sold in defined marketing areas (Federal areas adjusted for comparability where necessary); data are revised for earliest date shown, preliminary for others. See page 27 for markets combined. S- Data from State sources. b. Military sales excluded. d. Computed from unrounded data. Average fat test for 64 areas; markets included in totals only if fat test reported for all comparisons.

Compiled from reports of Market Administrators and State milk control agencies.

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See page 29 for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
S- Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.
e. Estimated.

Compiled from reports of Market Administrators and State milk control agencies.

(Continued from page 20)

Receipts from producers during December up 7 percent

Producer receipts on an average daily basis in 76 Federal Order and 5 state marketing areas during December, were 7 percent above a year earlier. Receipts per producer averaged 715 pounds during December which was 10 percent over the corresponding month a year ago. The milkfat test of receipts averaged 3.82 percent during December -- unchanged from a year earlier.

January milk production advanced 3 percent

Production of milk in January is estimated at 10.1 billion pounds. This is higher than January 1961 by 3 percent and above the 1951-60 average for the month by 10 percent. Total milk produced during January was sufficient to provide 1.77 pounds per person per day -- 1 percent more than in January a year ago, but 1 percent less than the 10-year January average.

1/ Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas. For a list of markets combined, see below. In Federal markets, producer-handlers not purchasing milk excluded. Previous year revised, current year preliminary.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Tennessee - Chattanooga, Knoxville, Memphis and Nashville; Mississippi - Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; and Colorado - Colorado Springs-Pueblo and Western.

ANNUAL SUMMARY: PRICES AND RECEIPTS, 1961

Dealers' buying prices average 5 cents per hundredweight below 1960

Milk for fluid use prices in 1961 averaged \$5.43 per hundredweight -- 5 cents less than 1960. The averages were lower in 5 of the 9 regions, the decreases ranging from 1 cent in the West South Central to 22 cents per hundredweight in New England. Prices averaged about the same on the Pacific Coast but were higher in 3 regions. Average prices for the first 8 months of 1961 were close to 1960 levels. In the latter part of the year, prices were lower than a year earlier by 8 cents in September, 13 cents in October, 15 cents in November and 18 cents in December.

Home delivery single quart prices four-tenths of a cent higher

Average prices for the most common grade of milk delivered to homes in 25 major cities averaged 26.8 cents in 1961. This is four-tenths of a cent above 1960. For the first 7 months of the year, prices averaged about a half-cent above a year earlier. From August through December prices were only slightly above 1960. Of the 25 markets, yearly averages were higher for 1961 in 19. In 4 markets, New York City, Milwaukee, Jacksonville, and Portland, the average for the year was about the same as 1960, but in 2 markets, New Orleans and Dallas, the average was lower.

The prices shown in tables numbered 3, 17 and 18 reflect revisions due to a minor change in definition. For a number of years, whole milk now sold as "regular or creamline" was generally considered "standard grade". However, "homogenized vitamin-D" grade milk is now in more common use in most places and is sold at a different price from regular in six of these markets. Since a January 1958 survey, which pointed out these differences, prices for other grades than HVD have been continued in the table quotations for comparability. A recent survey in each of the six markets revealed that HVD became the most common grade for single quart home delivery at dates differing from July 1950 to July 1960. Accordingly, all prices now shown reflect the concept "most common grade" and are comparable with the previous "standard grade" concept in use prior to 1950. Users of the data should bear in mind that the single quart home delivery concept has not been disturbed and still does not take into account discounts for quantity delivery.

Milk receipts for 1961 continue above previous year by 7 percent

Receipts of milk from producers in 76 Federal Order and 5 State marketing areas averaged 137.2 million pounds per day in 1961. This is 7 percent greater than 1960. The number of producers in these markets decreased 2 percent for the same period. Receipts per producer averaged 714 pounds per day for the year -- 10 percent higher than the previous year.

1/ The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase. Service charge effective: Minneapolis, all of the period shown prior to June 1957; San Francisco, beginning March 1957; Los Angeles, May 1956 through August 1958.

FLUID MILK AND CREAM REPORT

MARCH 1962

SUMMARY

Resume
1.9
M 34 M

Early March fluid milk prices showed mixed changes from the previous month, the Crop Reporting Board reports. Dealers' buying prices declined as much as 11 cents in 21 markets or 1 in about every 8; prices were higher by at least that much in 6 markets. Home delivery prices for single quarts decreased one-half cent or more in 4 markets but increased in 3. On the other hand, store quarts were higher in 7 markets and lower in 5. Half-gallons (out-of-stores) advanced in 7 markets but declined in 8. Gallon jugs dropped in 4 markets but were priced upward in 3. Fluid use prices in a number of markets are not currently determined but will be reported next month.

Prices of milk for fluid use in about 160 markets in early March averaged \$5.43 per hundredweight. This is 5 cents lower than February and 3 cents below March last year. Six of the 9 regional averages declined from February; two were unchanged and 1 was higher. Compared with March a year ago, 5 of the 9 regional averages were lower. These decreases ranged from 2 cents in the West North Central to 19 cents in the Mountain States. The average in New England was unchanged from a year ago. Higher average prices than a year ago were: 2 cents per hundredweight in the East South Central; 4 cents in the East North Central and 9 cents in the South Atlantic.

Single quart home delivery prices for the most common grade of whole milk in 25 major cities in early March averaged 27.0 cents. This is unchanged from February but two-tenths of a cent over March a year earlier. Compared with the 1956-60 average for the month, the price this March was 1.7 cents greater. The only reported price change from February for this group of markets was a 1-cent drop in New York City.

Sales of whole milk (preliminary) in 66 Federal Order and 6 State marketing areas during January were 7 percent above December and 1 percent above a year earlier. Average daily sales of skim milk items in 71 areas in December declined 4 percent from December but were 4 percent above December last year. Milk and cream mixture sales (half-and-half) in 66 markets for December advanced 2 percent from November but were 4 percent less than December 1961. Sales of fluid cream products (averaged daily) during December in 67 areas increased 11 percent from November but were fractionally under a year earlier. Total fluid product sales in 70 areas for December declined 3 percent from the previous month and were 2 percent under December 1961. Average daily receipts from producers in 76 Federal Order and 5 State marketing areas during January were 7 percent more than the same month last year. Receipts per producer in that month, at 756 pounds, were 10 percent above January 1961.

Annual sales by type of product...pages 27-31

PRICES IN FLUID MILK MARKETS, MARCH 1962

In New England, early March prices of milk for fluid use averaged \$6.01 per hundredweight -- 1 cent below February, but unchanged from March last year. Augusta and Portland, Maine Class I prices declined 36 cents per hundredweight and selling prices were about 1 cent per quart lower.

Class I milk prices in the Middle Atlantic States in early March averaged \$5.96 per hundredweight. This is 12 cents under both February this year and March a year ago. In the New York-New Jersey marketing area, the Class I price was 19 cents per hundredweight less. New York City home and store prices dropped 1 cent per quart. Elsewhere in the area reported prices were unchanged for home delivery and out-of-store sales.

East North Central milk for fluid use prices averaged \$4.66 per hundredweight in early March -- a decline of 3 cents from the previous month, but 4 cents greater than the same month in 1961. Toledo, Ohio reported a downward adjustment in half-gallons out-of-stores. Class I prices in this market are not currently determined. The Class I price in Columbus, Ohio was down 12 cents per hundredweight with some drop in half-gallons and gallons out-of-stores. In Evansville, Ind. a 9-cent Class I price decrease was reported. Single quarts at homes and stores were priced the same as in February, but store half-gallons were from 3 to 9 cents lower. Class I prices in South Bend, Ind. were 16 cents higher but no other price changes were reported. Rockford, Ill. reported the same Class I price for March as in February. Single quarts at home and stores were one-half cent higher, but other resale prices were unchanged. In Springfield, Ill Class I prices were 10 cents per hundredweight lower. Home delivery prices were unchanged, but store prices showed some upward movement. Grand Rapids, Mich. home delivery and half-gallons out-of-stores were slightly lower. Dealers' buying prices in this market are not currently determined. Class I prices in Beloit, Wis. decreased 21 cents per hundredweight with some corresponding movement at consumer levels. Green Bay, Wis. reported a 9-cent per hundredweight downward difference for Class I milk. Store half-gallons were 1 cent lower, but other prices were the same as in February. Madison, Wis. gallon jugs were 2 cents lower. Other home and store prices showed no change; Class I prices are not currently determined in this market.

Dealers' buying prices for fluid use milk in the West North Central Region in early March averaged \$4.27 per hundredweight. This is 3 cents under February and 2 cents below March last year. Class I prices in the Duluth-Superior, Minn.-Wis. area were 11 cents per hundredweight higher, but home and store prices were unchanged. The only price difference for Burlington, Iowa was a 1-cent drop in single quarts out of some stores. The Des Moines and Ft. Dodge, Iowa markets each reported 21-cent per hundredweight declines in Class I prices, but no changes in home and store prices. The Class I price in Kansas City, Mo. was 10 cents per hundredweight above February. Home delivery quarts and store half-gallons were unchanged. Store quarts were 1 cent higher, gallons showed declines of from 10 to 14 cents. St. Louis and Springfield, Mo. Class I prices decreased 19 cents per hundredweight. No price changes were reported at homes and stores in these markets.

In the South Atlantic States, Class I prices averaged \$6.05 per hundredweight in early March -- an advance of 4 cents from February and 9 cents from March last year. Baltimore Class I prices were 15 cents per hundredweight higher but home delivery and store purchase prices were the same as in February.

Milk for fluid use prices in the East South Central Region averaged \$5.31 per hundredweight in early March. This is a decrease of 4 cents from the previous month, but 2 cents over March 1961. Louisville and Lexington, Ky. Class I prices advanced 18 cents per hundredweight. Lexington home and store prices have not been reported, but those in Louisville were unchanged. Paducah, Ky. Class I prices declined 19 cents per hundredweight; home and store prices were the same as in February. Class I prices declined 23 cents and 36 cents per hundredweight, respectively, in Memphis and Nashville, Tenn. Other prices in these markets were unchanged.

West South Central fluid use prices averaged \$5.42 per hundredweight in early March -- a drop of 8 cents from February and 10 cents from March last year. The only price change reported for Shreveport, La. was a 1-cent increase in store quarts. Oklahoma City Class I and gallon jug prices made slight adjustments. The Class I price in Tulsa, Okla. was 19 cents per hundredweight lower with some adjustment in half-gallons and gallons at stores. A Class I price decline of 44 cents per hundredweight in Austin, Tex. was accompanied by a 3-cent per half-gallon rise in the price of store half-gallons. Dallas, Tex. Class I prices were 44 cents per hundredweight lower; others unchanged.

Milk for fluid use prices in the Mountain States in early March averaged \$5.34 per hundredweight. This is unchanged from the previous month but lower than last March by 19 cents. No important Class I price changes were reported for the region. Colorado Springs, Colo. quart prices were the same as in February, but store half-gallons and gallons advanced 2 cents per quart. Denver, Colo. quart prices were unchanged; half-gallons out-of-stores were also 2 cents per quart higher. Albuquerque, N. Mex. single quart prices were 1 cent higher with store half-gallons unchanged to 2 cents under February. Half-gallons in Phoenix, Ariz. were 15 cents above February as the price war which has been on and off for several months continued to relax. Other prices were unchanged in this market.

On the Pacific Coast, average prices for milk for fluid purposes were \$5.44 per hundredweight in early March. This is the same as February, but 3 cents under March 1961. No important price changes in this region were reported this month.

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

c. Averages shown in February Annual Summaries should be as follows instead of as shown for 1961:

March 26.8¢; June 26.4¢; Oct. 26.9¢; Nov. 27.0¢.

S- From State sources. D.R.- Payment in direct ratio to milkfat. PA- Producers' association prices. a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. h. Gallon jug milk \$6.125 D.R. at basic test. k. Average of blend prices paid by all plants in the State. m. \$5.89 Shreveport, \$6.24 Ruston, Monroe & Bastrop. n. Negotiated at basic test: Jan. Class I \$5.07, blend \$4.64 at Oklahoma City; Class I \$5.00, blend \$4.51 at Tulsa. p. Class I \$5.12, blend \$4.66 at Ardmore and Lawton. q. Louisiana Milk Commission minimum price. s. Mississippi Milk Commission minimum price. t. Includes 7¢ from earnings. v. Weighted average of area pools. w. 11¢ payment to producers for January deliveries to be paid in February.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, DECEMBER 1961 AND JANUARY 1962

Whole milk sales for January advance 1 percent from last year

January whole milk sales (preliminary) in 66 Federal Order and 6 State marketing areas, at 84.0 million pounds per day, were 7 percent above December and were 1 percent higher than January a year ago. The average milkfat test of sales of whole milk in 65 of these markets during December was 3.57 percent, compared with 3.58 percent in December 1960.

December skim milk sales 4 percent higher than a year earlier

Average daily sales of skim milk products in 71 marketing areas during December were 4 percent less than November but 4 percent more than December a year ago.

Sales of half-and-half 4 percent under December 1960

Milk and cream mixture (half-and-half) sales during December in 66 areas averaged (daily) 2 percent above November but were 4 percent below December a year earlier. Sales in Chicago and California which together make up almost half the sales of the entire group, were 9 and 6 percent, respectively, below December 1960. For the remaining areas, sales were 1 percent more than November but were only 1 percent less than December a year ago.

Fluid cream sales in December fractionally lower than 1960

Sales of all other fluid cream products for December (average daily basis) in 67 areas advanced 11 percent from November but were fractionally under December 1960. The milkfat test of sales of these items in December averaged 23.9 percent as compared with 23.8 percent in December 1960.

December total fluid sales 2 percent under a year earlier

Average daily sales of all fluid products during December in 70 areas were 3 percent less than November and were 2 percent lower than December 1960. For the entire year of 1961, total fluid sales in this group of markets declined fractionally from 1960. The average milkfat test of total fluid sales during December was 3.78 percent compared with 3.79 percent in December a year earlier.

Producer receipts during January up 7 percent

Milk receipts from producers (average daily) in 76 Federal Order and 5 State marketing areas during January were 3 percent higher than December and 7 percent greater than January a year ago. Receipts per producer for January averaged 756 pounds -- 10 percent above January last year. The average milkfat test of receipts in January was 3.82 percent, the same as January 1961.

(Continued on page 27)

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
S- Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.
e. Estimated. r. Revised.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Tennessee - Chattanooga, Knoxville, Memphis and Nashville; Mississippi - Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; and Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

Production of milk during February 2 percent greater than last year

February milk production in the United States, estimated at 9.6 billion pounds, decreased 5 percent seasonally from January but was 2 percent higher than February a year ago. On a per capita basis of 1.86 pounds, February production was slightly higher than February last year but 0.05 pound lower than the 10-year average for the month.

FLUID MILK AND CREAM PRODUCT SALES IN CERTAIN FEDERAL ORDER AND STATE MARKETING AREAS, ANNUAL, 1960-61

On an average daily basis, total product-pound sales of all fluid products, as reported in 66 Federal Order and 6 State marketing areas, were slightly lower in 1961 than in 1960. Increases in sales of skim milk items, as reported, did not quite offset decreases in whole milk products. Also, increases in sales of eggnog and sour cream products were not so great as decreases in other cream items. The 72 areas for which whole milk sales are shown represent about 70 percent of the nonfarm population of the United States. For skim milk item and cream mixture sales, the data for 71 areas represent about 60 percent and for cream items 67 areas comprise about 55 percent of the non-farm population figure.

Average daily sales of plain whole milk were 1 percent lower in 1961 than 1960. Yogurt sales decreased 1 percent; flavored whole milk 2 percent. Increased sales of skim items were as follows: flavored, 6 percent; plain, 14 percent; and fortified, 17 percent. Buttermilk sales (average daily) declined 5 percent. Increased sales were reported for eggnog, 1 percent, and sour cream, 9 percent. Downward movements in cream item sales (average daily) were: heavy, a fraction of 1 percent; mixtures, 2 percent; and light, 10 percent.

FLUID MILK AND CREAM REPORT
MAY 1962

May 17, 1962

SUMMARY

Prices for fluid use milk in early May continued the seasonal decline, the Crop Reporting Board reports. Dealers' buying prices were under April levels in 63 markets -- about 1 in every 3. Higher prices for fluid-use milk were reported in 6 markets. Home delivery quarts were lower in price in 19 markets but higher in 1. Store price changes were as follows: Quarts - lower, 26 markets, higher, 4; half-gallons down, 19 markets, up 5; gallons - decrease, 11 markets and increase, 2 markets. In a number of markets, dealers' buying prices are not currently determined but will be reported next month.

Fluid-use milk prices in early May (in about 160 markets) averaged \$5.11 per hundredweight. This is 13 cents under the April average and 6 cents below May 1961. The regional averages were lower than April in all sections of the country except the South Atlantic and Pacific, both of which were unchanged. Compared with May a year earlier, current averages were lower in all regions, ranging from 1 cent per hundredweight in New England to 36 cents in the West South Central.

Single quart home delivery prices in early May for the most common grade of whole milk averaged 26.7 cents per quart for 25 major markets. This is 0.1 cent per quart less than April but 0.3 cent above May last year. Compared with the 1956-60 average for the month, the current average is 1.5 cents per quart higher. Boston prices declined one-half cent a quart from April; New York City and Detroit prices were 1 cent lower.

Average daily sales of whole milk (preliminary) in March in 68 Federal Order and 6 State marketing areas were 2 percent above both February this year and March of last year. Skim milk sales in 73 of these areas during February advanced 2 percent from January and were 6 percent greater than January 1961. Sales of mixtures of milk and cream (average daily) for February in 67 markets increased 1 percent from January but declined 1 percent from February a year ago. Sales of other cream items during February were 4 percent higher than January and fractionally above February last year. Average daily sales of all fluid products in 72 areas during February were about the same as both January and February a year earlier. Average daily receipts from producers in 76 Federal Order and 5 State marketing areas were 3 percent higher than February and 4 percent over March 1961. Receipts per producer, at 779 pounds per day, were 7 percent greater than a year earlier.

PRICES IN FLUID MILK MARKETS, MAY 1962

New England prices for fluid-use milk in early May averaged \$5.35 per hundredweight - 22 cents less than April and 1 cent below May last year. Prices were lower by 22 cents per hundredweight or $\frac{1}{2}$ cent per quart in the Maine and New Hampshire markets reporting. Home and store prices in Bellows Falls and Burlington, Vt. were 1 cent under April. Producer prices in these markets are not currently determined. Class I prices in the five Federal Order markets of Southern New England were 22 cents per hundredweight less; home delivery and store prices generally dropped $\frac{1}{2}$ cent.

Class I prices in the Middle Atlantic area in early May averaged \$5.45 per hundredweight. This is 20 cents under April and 11 cents below a year earlier. The Class I price in the New York - New Jersey area declined 30 cents per hundredweight. In New York City and Northern New Jersey, home and store prices dropped one cent per quart. Upstate New York markets were generally unchanged at consumer levels.

In the East North Central region, milk for fluid use prices in early May, at \$4.44 per hundredweight, were lower than April by 12 cents and below May of last year by 4 cents. Class I prices in Columbus, Ohio increased 11 cents per hundredweight. Resale prices were steady with some weakening in the price of store half-gallons. Fort Wayne, Gary and Indianapolis, Ind. Class I prices decreased 16 cents per hundredweight. South Bend Class I prices advanced 30 cents per hundredweight. Consumer prices in all 4 of these markets were at the same level as April. Chicago, Ill. prices declined 20 cents per hundredweight at Class I; home delivery prices were unchanged but store quotations were $\frac{1}{2}$ cent per quart lower. A decline of 16 cents per hundredweight in Rock Island, Ill. was accompanied by some downward adjustment in quart and half-gallon store prices. Detroit, Mich. home delivery prices were 1 cent lower, with a lower range for half gallons. Grand Rapids single quarts dropped in some stores. Prices in both of these Southern Michigan markets are not currently determined. Class I prices in Beloit, Wis. were 16 cents per hundredweight below April. Home delivery prices dropped 2 cents; store prices were unchanged to about a cent per quart lower. In Green Bay, Wis., a 20 cent per hundredweight decrease in Class I prices was accompanied by unchanged prices at consumer levels.

Prices of milk used for fluid purposes in West North Central area markets averaged \$4.04 per hundredweight in early May. This is 11 cents under April and 20 cents lower than May 1961. In Duluth, Minn. and Superior, Wis. Class I prices were reduced 16 cents per hundredweight but some increase at consumer levels was noted from earlier low levels. In Minneapolis and St. Paul, Minn., Class I prices were down 12 cents per hundredweight but consumer prices were unchanged. Des Moines and Ft. Dodge, Ia. fluid use prices declined 16 cents per hundredweight with no changes in prices at homes and stores. Lowering Class I prices by 15 cents per hundredweight in the greater Kansas City and Wichita, Kans. markets did not affect prices at consumer levels. Class I prices in Lincoln and Omaha, Neb. were 19 cents per hundredweight lower. Prices at homes and stores in Omaha were unchanged but in Lincoln, Neb. declined 1 cent per quart.

South Atlantic fluid-use prices in early May at \$5.83 per hundredweight were unchanged from April but were 4 cents under May a year ago. Wheeling, W. Va. Class I prices decreased 16 cents per hundredweight; consumer prices were unchanged. Fluid purpose milk in Miami, Fla. increased 18 cents per hundredweight. Home and store prices have not been reported.

Class I prices in East South Central markets in early May averaged \$5.20 per hundredweight. This is 4 cents below April and 6 cents under May a year ago. Class I prices in Paducah, Ky. were reduced by 16 cents per hundredweight with some downward adjustment in store quarts.

Prices for fluid-use milk in the West South Central area averaged \$5.11 per hundredweight -- 16 cents less than April and 36 cents below last May. Class I prices in Ft. Smith, Ark. declined 17 cents per hundredweight with home and store prices remaining at April levels. Little Rock, Ark. had price decreases of 16 cents per hundredweight and about 1 cent per quart at consumer levels. In Shreveport, La. the only price change reported was a 1 cent decline in store quarts. Tulsa, Okla. Class I prices advanced 16 cents per hundredweight; home and store prices were unchanged. Austin and Dallas, Tex. reported 14 and 13 cents per hundredweight decreases, respectively, with little change at consumer levels.

Mountain region Class I prices in early May averaged \$5.22 per hundredweight. This is a reduction of 13 cents from April and is 27 cents lower than May last year. In Denver, Colo., Phoenix, Ariz., Tucson, Ariz., and Salt Lake City, Utah, Class I prices were lower by 18 cents per hundredweight. In each of these markets except Phoenix, consumer prices remained at April levels. The price war reported earlier in Phoenix relaxed somewhat with half-gallons stabilizing at 43 cents.

On the Pacific Coast, Class I prices in early May averaged \$5.34 per hundredweight -- the same as April but 18 cents higher than May 1961. Bremerton, Wash. Class I prices declined 24 cents per hundredweight; consumer prices were unchanged. Everett and Seattle, Wash. reported a Class I price decrease of 29 cents per hundredweight. Everett home and store prices have not been reported but in Seattle there were no changes. Medford, Ore. reported a 30 cent per hundredweight reduction in Class I prices. Home delivery prices were 1 cent per quart lower but store prices were unchanged. Class I prices in Portland and Salem, Ore. increased 11 cents per hundredweight; home and store prices in both these markets were unchanged.

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

S- From State sources. D.R.- Payment in direct ratio to milkfat. PA- Producers' association prices. a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. h. Gallon jug milk \$6.125 D.R. at basic test. k. Average of blend prices paid by all plants in the State. m. Louisiana Milk Commission minimum price. n. Mississippi Milk Commission minimum price. q. Weighted average of area pools. s. Corrected. t. Negotiated \$3.93 for February.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, FEBRUARY-MARCH 1962

March whole milk sales increase 2 percent over a year ago

Average daily sales of whole milk (preliminary) in 68 Federal Order and 6 State marketing areas during March, at 86.0 million pounds per day, were 2 percent greater than February and also March a year ago. Cumulative daily sales for the first quarter of the year were about $1\frac{1}{2}$ percent above the same period last year. The average milkfat test of sales of whole milk in February, at 3.56 percent, was unchanged from February 1961.

Skim milk sales for February gain 6 percent from last year

Sales of skim milk products (average daily) in 73 areas in February advanced 2 percent from January and 6 percent from February a year ago. Sales in Chicago were 4 percent lower, Southern Michigan about the same as a year earlier and California 3 percent higher. These three areas cover over half of the sales represented. For the remaining areas total sales were 2 and 8 percent respectively above January 1962 and February 1961. Cumulative daily sales for January-February 1962 were 7 percent above the same period in 1961. The average milkfat test of skim items in February was 1.14 percent as compared with 1.16 percent in January and 1.12 percent for February last year.

Sales of mixtures down 1 percent from a year earlier

Mixtures of milk and cream (half-and-half in most markets) in 68 markets during February averaged daily 1 percent above January but were 1 percent below February 1961. The three most important market groupings reported the following comparisons of February 1962 sales with 1961: Chicago 93 percent, Southern Michigan 103 percent and California 96 percent. The remainder of the areas in total were 2 percent above February of last year (average daily). Cumulative daily sales of mixtures for the first two months of the year were unchanged from a year earlier.

Fluid cream sales slightly above last year in 69 marketing areas

Average daily sales in 69 marketing areas of fluid cream products (other than mixtures) during February were 3 percent higher than January and were fractionally above February last year. Of the 43 market groupings in the table, 19 showed higher sales than February a year ago. In 4 markets, sales were about the same but 20 markets reported higher sales. The average milkfat test of fluid cream products in February was 24.2 percent. This compares with 24.1 percent in January and 23.8 percent in February 1961.

February sales of all products 1 percent greater than a year earlier

Total fluid product sales (average daily basis) in 72 Federal and State areas during February were about the same as January but 1 percent above February a year ago. Of the 45 market groupings in this comparison, 28 reported higher sales than last year. The average milkfat test of sales of all fluid products for 67 of

(Continued on page 27)

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
S- Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa-Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota-Black Hills and Sioux Falls-Mitchell; Kansas-Neosho Valley, Southwest and Wichita; Lou.-Lex., Paducah, Ohio Valley; Tenn.-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas-Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; and Colorado-Colorado Springs, Pueblo and Western.

(Continued from page 20)

these areas in February was 3.66 percent, the same as January but 0.08 percent lower than February 1961.

Receipts from producers 4 percent greater than in March 1961

Average daily receipts from producers in 76 Federal Order and 5 State marketing areas in March were 3 percent over February and 4 percent higher than March 1961. Receipts per producer, at 779 pounds in March, were 7 percent more than in March of last year. The average milkfat test of receipts during March was 3.92 percent, compared with 3.95 percent a year earlier.

Milk production in April 1 percent above 1961

Production of milk in the United States for April is estimated at 11.3 billion pounds. This is 1 percent more than April of last year and slightly above the previous record high for the month set in 1956. Cumulative production for the first third of the year was 2 percent more than for the same period in 1961. Per capita production averaged 2.04 pounds per day, compared with 2.05 pounds in April 1961.

FLUID MILK AND CREAM CONSUMPTION IN SELECTED MARKETING AREAS 1/

This issue carries forward the series of sales and consumption data by marketing areas published in Statistical Bulletin No. 312 in May 1962. The following areas have been added to the series: North Central Ohio, Washington, D. C., and Great Basin, Utah. The Quad Cities area has been dropped because sales data are not available after merger with the Dubuque area.

The current bulletin supplies data for a total of 71 Federal Order, State and other areas for 1960 and 1961. For the 71 areas, the sum of the estimated area populations for 1961 are about 65 percent of the nonfarm population of the United States.

The data for 62 marketing areas were provided by Federal Order Administrators. Sales data for the other respective areas were supplied by the following agencies: Division of Milk Control, New York (Niagara Frontier and Rochester); Office of Milk Industry, New Jersey; Department of Agricultural Economics, Pennsylvania State University (for Allegheny County); Baltimore City Health Department; Virginia State Milk Commission; North Carolina Milk Commission; South Carolina Dairy Commission; and California Crop and Livestock Reporting Service. Data for the New York Metropolitan area for 1960 are from "Consumption of Milk and Cream in the New York City Market and Northern New Jersey" by Dr. Leland Spencer and Ida A. Parker, Cornell University, Bulletin No. 965, July 1961. Sales for 1961 for this market were supplied also by these authors. Acknowledgment is due the various agencies for compiling the data in the detail represented in this report.

1/ Prepared by L. W. Haynes and K. D. Ackers, Agricultural Statisticians, Agricultural Estimates Division, SRS, under the general direction of G. G. Butler, Head, Milk Section, and I. E. Wissinger, Chief, Dairy Statistics Branch.

Revised data for earlier years were published in "Fluid Milk and Cream Consumption in Selected Areas, 1950-59", Statistical Bulletin No. 312, May 1962. Copies of this report can be obtained by writing to:

CROP REPORTING BOARD,--Statistical Reporting Service,
U. S. Department of Agriculture, Washington 25, D.C.

SUMMARY

Combined consumption of fluid milk and cream in 1961 continued the downward movement of earlier years. Annual product pound sales actually declined for the first time for whole milk and other products in a number of markets; population maintained a steady increase. In many markets, decreased consumption from 1960 to 1961 was more marked than from 1959 to 1960.

Although consumption of whole milk (by far the most important) declined substantially in many places, other product consumptions increased. Skim items in general made important relative gains but added far less to total product per person usage. Yogurt and flavored whole milk consumption increased in some areas but decreased in others. Plain and fortified (solids added) skim milk did make substantial gains in many markets. Flavored skim milk increased and decreased in popularity depending on the area. Buttermilk continued to lose ground. Mixtures of milk and cream (half-and-half) continued to advance in usage but at a lesser rate than in recent years. The per capita consumption of sour cream and eggnog increased in many markets but declined in a few. Light and heavy cream were generally down in consumption rates but an upward movement in a few places was noted.

The milk equivalent of fluid cream products (per capita) continued a steady downward movement in most markets. The milk equivalent of all fluid items used per person declined at a faster rate than either the product pounds of whole milk or the milk equivalent of cream. As milk equivalent is a fat concept, decreasing fat percentages in whole milk and some other products and smaller usages of the higher fat items were largely responsible for the declines.

INTRODUCTION

Annual per capita rates of consumption, calculated in the same manner as the 1950-59 bulletin, are shown for 1960 and 1961. Reported annual sales for the same products and estimated annual population for each area are also presented. Sales and consumption rates are in annual product pounds. Caution is suggested in making comparisons of consumption rates between markets. Consumption trends for each market would be more valid.

POPULATION ESTIMATES

Current methods of preparing population estimates for the marketing areas are described in the 1950-59 bulletin. Year-to-year changes as established for the decade 1950 to 1960 were generally carried forward. However, where other indications (such as current State estimates) suggested modification, these were made. Although the accuracy of the population estimates probably varies between areas, it is believed they are sufficiently reliable for further analysis.

For 1961, the population estimates of all comparable marketing areas were higher than in 1959. For the 69 comparable areas, the estimates for 1961 were 2 percent higher than in 1960. For 11 markets, the estimated population increases were about 3 percent. In only 4 markets were the projected populations more than 4 percent above the previous year. For the remainder of the markets, population was either unchanged or advanced less than 3 percent from 1960.

PER CAPITA CONSUMPTION OF FLUID
MILK AND CREAM PRODUCTS

Whole milk products

Total per capita sales of whole milk products in 1961 were lower than in 1960 in 63 of the 71 marketing areas appearing in table 15. These products include deliveries of plain and flavored whole milk and yogurt where available. In the 63 markets shown, 29 reported declines of at least 10 pounds per person. Of the 10 largest areas (according to population) in the group, whole milk per capita rates declined in all 10 and ranged from 2 pounds in North Carolina to 17 pounds in Northeastern Ohio. Declines of 12 pounds were reported in both the Chicago and Southern Michigan areas, and 11 pounds in the New York Metropolitan area. Ten-pound-per-person decreases were reported in both Philadelphia and California. From 1959 to 1960, the decline was at a lesser rate in most of these 10 markets. Of the 68 markets for which whole milk sales are available, 52 markets reported lower rates of per capita consumption in 1960 than in 1959. However, in only 13 markets was the decline as much as 10 pounds per consumer. Comparing the consumption rates for the 10 largest marketing areas, the decline from 1959 to 1960 was greater than 7 pounds per person in only 2. Five of the 10 areas reported 1960 consumption rates from 5 to 7 pounds per person lower than in 1959.

Skim milk products

Skim milk consumption (per person) was generally higher in 1961 than in 1960 as summarized in table 16. The skim milk products included are plain, fortified (solids added), flavored, and buttermilk. Per capita consumption rates in 53 of the 69 areas for 1961 were higher; in only 16 areas, were the rates lower. Seven areas reported total skim sales in 1961 higher than in 1960 by more than 5 pounds per person. These were: Milwaukee, Wis., Minneapolis-St. Paul, Minn., Black Hills, S. D., Sioux Falls-Mitchell, S. D., Central Arizona, Great Basin, Utah, and Inland Empire, Wash.-Ida. In no case was the decrease as much as 2 pounds per person. From 1959 to 1960, 45 of the 67 area rates of consumption per individual increased.

Milk equivalent of fluid cream

Consumption of cream items (per capita) in total milk equivalent terms continued the downward trend (table 17). The milk equivalent of cream is the equivalent quantity of producer milk at average fat test required to supply the milkfat in all cream products. The cream products covered are milk and cream mixtures, eggnog, and light, heavy, and sour cream. Per capita rates for the 67 marketing areas available were lower in 41, with the decrease in 11 of them as much as 3 pounds per person. In 17 markets, the rate was about the same, but in 9 markets per capita consumption was higher. The decline in 1960 was not quite as marked. Of the 65 areas with per capita rates available, only 24 were lower than 1959. In 26 areas, the milk equivalent per capita rate was about the same for both years, but in 15 the rate was actually higher.

Milk equivalent of all fluid products

The milk equivalent of all fluid products consumed on a per person basis in 1961 as shown in table 18 made sizable declines from 1960. This comparison is also a milkfat relationship as was the previous one. Fifty-one of the 65 areas carried in this table reported declines from 1960. In 8 markets, the drop was as much as 15 pounds of milk equivalent per person. The rate was about the same in 1961 as 1960 in 2 markets, but was higher in 9. The downward adjustment in per capita rates from 1959 to 1960 was not as large as 1960 to 1961. Of the 58 areas having comparisons, only 43 showed lower rates in 1960 and only 6 were as much as 15 pounds per consumer.

SALES AND PER CAPITA CONSUMPTION FOR INDIVIDUAL MARKETS

New England

An 8-pound-per-person decline in whole milk consumption from 1960 to 1961 in both Boston and Springfield, Mass. was reported, with some increase in skim items. The Worcester, Mass., consumption reported was lower for all items. A small decrease in whole milk consumption in Southeastern-New England was almost offset by increases in skim milk. Connecticut consumption of whole milk items was lower but increases in some skim and cream items were noted.

Middle Atlantic

A decline from 1960 to 1961 of 11 pounds in the per capita consumption of whole milk and a 6-pound decrease in the milk equivalent of cream was reported for the New York Metropolitan area. Decreases in whole milk consumption with some increases in skim items occurred in New Jersey. Cream consumption was fairly stable in the State. Allegheny County (Pittsburgh), Pa. consumption was down for both whole milk and cream. For Philadelphia, Pa., a drop in whole milk and heavy cream consumption was partially offset by increases in skim items.

East North Central

A decline of 18 pounds per person of plain whole milk occurred from 1960 to 1961 in Northeastern Ohio; increases were reported for some skim and cream products. Cincinnati, Ohio per person usage for the period was fairly stable. Consumption of whole milk in Columbus, Dayton-Springfield and North Central, Ohio was down, with some increases in other items. Toledo, Ohio whole milk usage dropped 20 pounds per person. Utilization of some other products was higher. Most whole and skim items showed higher consumption in Ft. Wayne, Ind. South Bend, Ind. whole milk consumption was down but other usages were either stable or higher. Per person usage of whole milk was 11 pounds lower than 1960 in both Chicago, Ill. and Detroit, Mich.; a few other products showed increases in both markets. Michigan Upper Peninsula and Northeastern Wisconsin consumption was fairly stable. Most fluid items in Milwaukee, Wis. showed fairly stable consumption rates.

West North Central

The most important change in Minneapolis-St. Paul, Minn., from 1960 to 1961, was an increase in consumption of plain and fortified skim milk. The Des Moines and Sioux City, Ia. markets also showed increases in skim milk items. Kansas City, Mo.-Kans. per capita rates were close to 1960 levels except for sour cream which was higher. For St. Louis, Mo., consumption was down for all products except flavored whole, plain and flavored skim, and sour cream. Consumption in the Ozarks, Mo-Ark. area was fairly stable. Black Hills and Sioux Falls, S.D. each reported substantial increases in skim product consumption. Omaha-Lincoln-Council Bluffs, Neb-Ia. gave increases in some skim items and sour cream. Wichita, Kans. whole milk consumption was substantially lower; other items showed lesser total change.

South Atlantic

In Wilmington, Del., a drop in the per capita rates of whole milk plus an increase in eggnog consumption were reported. Baltimore, Md. levels of consumption in 1961 were little changed from 1960. Some skim items and cream items were up in Washington, D. C. In Richmond, Va., per capita rates were fairly stable with declines in several items. The Appalachian, Va.-W.Va.-Tenn., and Clarksburg, W.Va. markets reported higher consumption of whole milk and several other items. Declines of consumption (per person) in plain and flavored whole milk and fortified skim milk were most important in Wheeling, W. Va. for the period. Consumption in both North Carolina and South Carolina was fairly stable. A decline in usage of most whole milk and some cream items in Southeastern Florida was reported.

East South Central

Louisville-Lexington, Ind.-Ky. whole milk consumption was 10 pounds per capita under 1960 but other item usage was fairly stable. Utilization per person of most fluid items in Paducah, Ky. was fairly stable. Consumption of most fluid products was stable in the 4 Tennessee markets for which information is available; Knoxville per capita whole milk utilization decreased 10 pounds. Few sizable changes from 1960 consumption occurred in the three Mississippi areas.

West South Central

Central Arkansas consumption of whole milk in 1961 was somewhat lower than 1960; mixtures and sour cream advanced. The New Orleans and Northern Louisiana area consumption rates were fairly close to previous year levels. Lower whole milk, buttermilk, eggnog and light cream consumption in Oklahoma Metropolitan areas were reported. Higher per capita rates than 1960 occurred in the Red River Valley, Okla.-Tex. market. Small declines in consumption of a number of products in the Austin-Waco and Central West Texas and Corpus Christi markets were noted. For North Texas, an 8-pound per person whole milk decline with similar cream item declines occurred. San Antonio and Texas Panhandle consumption decreases were reported for most fluid products.

Mountain

Declines of from 5 to 15 pounds per person for plain whole milk consumption occurred in the four Mountain State areas having data. Per person usage of skim milk items was noticeably higher in the Colorado Springs - Pueblo, Colo., Central Arizona and Geat Basin, Utah areas, with cream fairly stable. Western Colorado cream consumption dropped.

Pacific

A substantial decrease in whole milk consumption occurred from 1960 to 1961 in both the Inland Empire, Wash.-Ida. and Puget Sound areas; skim usage increased but at a lesser rate. Cream utilization held fairly well in both areas. Consumption of whole milk in California markets was 10 pounds per person lower than 1960. Most skim item usage was up; cream declines were small.

a. Product quantities shown are those sold within the marketing area or other geographic designation.

b. Milk equivalent data represent the quantity of producer milk at average test required to provide the milkfat in the respective product groupings.

c. Converted to 38 percent milkfat equivalent.

S- Sales data from State sources.

d. All cream items except half-and-half.

e. Yogurt reported with plain whole milk; fortified with plain skim; eggnog with other items (applies all years since 1950). Revised for 1959 to: Heavy cream, 8,660,000 pounds, 39.60 percent fat, per capita 1.50 pounds; milk equivalent of cream 44 pounds.

FLUID MILK AND CREAM REPORT
JUNE 1962

SUMMARY

Early June fluid milk prices were fairly steady at May levels, the Crop Reporting Board reports. Dealers' paying prices were lower in 7 markets but higher in 2. Home delivery prices advanced in 7 markets but declined in 1. Store quarts were higher in 6 but lower in 5. Half-gallons out-of-stores were up in 7 but down in 5 markets. Gallon jugs increased in 3 markets; decreased in 2.

Prices of milk for fluid use in about 160 markets in early June averaged \$5.10 per hundredweight - 1 cent below May and 5 cents under June 1961. Compared with the 1956-60 average for June, prices were 4 cents per hundredweight lower this year. The June average was lower than May in 5 of the 9 regions. In 3 regions the average was unchanged, but in 1 region it was higher. Compared with June a year ago, the price was lower in 7 of the 9 regions. These declines ranged from 1 cent per hundredweight in New England to 31 cents in both the West South Central and Mountain areas. Other large decreases were 20 cents in the West North Central and 10 cents in the East South Central Regions. The June average was about the same as a year earlier in the South Atlantic but 18 cents per hundredweight higher on the Pacific Coast.

Home delivered prices per single quart in early June in 25 major markets averaged 26.8 cents -- one-tenth cent above May and four-tenths of a cent over June last year. Compared with the June average for 1956-60, this year's price was 1.6 cents per quart higher. The only change reported from May to June was an increase of 1 cent per quart in Kansas City.

Average daily sales of whole milk (preliminary) in April for 68 Federal Order and 6 State marketing areas were 1 percent above April 1961 but 5 percent below the previous month. Skim milk sales in 73 of these areas during March were 7 percent higher than the same month last year and 4 percent greater than February 1962. March average daily sales of milk and cream mixtures (half-and-half) in 68 markets advanced 1 percent over year-earlier levels and were 3 percent above the previous month. Sales of other fluid cream items for the month of March were 1 percent lower than the same month last year but 4 percent higher than February totals. Daily average sales of all fluid products in 72 areas during March increased 3 percent from both March 1961 and February 1962. In 76 Federal Order and 5 State marketing areas, April daily receipts from producers were 5 percent higher than the comparable period of last year and 4 percent more than March 1962. Average daily receipts per producer for April were 813 pounds per day - 9 percent greater than April a year ago.

PRICES IN FLUID MILK MARKETS, JUNE 1962

Class I prices in New England in early June averaged \$5.35 per hundredweight. This is unchanged from May but 1 cent less than June last year. No important home or store price changes were reported for this region.

In the Middle Atlantic area, early June fluid use prices averaged \$5.45 per hundredweight--unchanged from May but 4 cents under June 1961. Home delivery prices in Syracuse, New York advanced 1 cent per quart and store quarts also increased 1 cent in some stores. No other changes were reported for the market.

Fluid use prices in the East North Central region in early June averaged \$4.42 per hundredweight. This is 2 cents below May and 6 cents less than June a year earlier. Evansville, Ind. Class I prices declined 16 cents per hundredweight but other prices in that market were unchanged. Alton, Ill. Class I prices were 4 cents per hundredweight lower. Store half-gallons advanced about 6 cents with other prices in the market unchanged. Rock Island, Ill. reported a decline of 7 cents in gallon jugs in some portions of the market with other prices the same as May. Springfield, Ill. home delivery and store quart prices were about the same as May but store half-gallons were about $\frac{1}{2}$ cent per quart lower. Class I prices declined 18 cents per hundredweight in Madison, Wis. Quart and half-gallon prices were higher at both homes and stores but store-gallons were lower. Milwaukee, Wis. reported a small decline in gallon jug prices with other prices little changed.

West North Central prices for fluid-use milk averaged \$3.98 per hundredweight in early June--3 cents under May and 20 cents lower than a year earlier. Minneapolis, Minn. reported some minor adjustment in quarts and half-gallons out of stores but other prices were virtually unchanged. In both the Missouri and Kansas portions of the Kansas City area a 4-cent downward adjustment in Class I prices was reported. Home and store prices were about 1 cent per quart above May. No changes were reported in other portions of the area. In Grand Forks, N. D. a price decline of 18 cents per hundredweight for Class I milk was accompanied by about a $\frac{1}{2}$ -cent drop in home and store quarts. Half-gallon store prices dropped about a cent per quart in some stores. Class I prices in Scottsbluff, Neb. were down 18 cents per hundredweight. Home and store quarts were the same as May but half-gallons were a cent higher in some stores.

Early June Class I prices in South Atlantic states averaged \$5.91 per hundredweight. This is 7 cents above May but unchanged from June last year. Class I prices in Washington, D. C. advanced 30 cents per hundredweight. Consumer prices in the market were unchanged from May levels.

Dealers' buying prices for Class I milk in the East South Central area in early June averaged \$5.15 per hundredweight--lower than the previous month by 5 cents and June 1961 by 10 cents. Lexington and Louisville, Ky. fluid-use prices decreased 16 cents per hundredweight from May. Consumer prices in Lexington were unchanged. Home delivery and store quarts and gallons were unchanged in Louisville. Half-gallons at stores in Louisville however were 2 to 8 cents lower. Some store quarts and half-gallons dropped a half-cent per quart in Paducah, Ky. with other prices in the market the same as May. The Nashville, Tenn. Class I price was 15 cents per hundredweight lower. Consumer prices have not been reported for this market.

For the West South Central region, prices for fluid-use milk in early June averaged \$5.11 per hundredweight. This is 2 cents under May and 31 cents below June last year. Fort Smith, Ark., reported a 13-cent decrease from May in some store half-gallons. Other prices in this market were unchanged. Quart prices out-of-stores advanced 2 cents in Shreveport, La. with no change in other prices reported. Dallas, Tex. reported Class I and home delivery prices about the same as May. Store quarts dropped $1\frac{1}{2}$ cents and half-gallons 1 cent per quart.

Mountain State fluid-use prices averaged \$5.15 per hundredweight in early June--5 cents below May and 31 cents lower than June a year ago. Quart prices at homes and stores in Idaho Falls, Idaho were 2 cents higher than May. Store half-gallons were up 3 cents. Phoenix and Tucson, Arizona Class I prices were 11 cents below the previous month but consumer prices were unchanged.

Class I prices in Pacific Coast markets in early June averaged \$5.32 per hundredweight--unchanged from May but 18 cents above June last year. The only reported price change from May was a $\frac{1}{2}$ -cent per quart increase for home delivery milk in Bremerton, Wash.

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, MARCH-APRIL 1962

April whole milk sales 1 percent above a year ago

Sales of whole milk (preliminary) for the month of April in 68 Federal order and 6 State marketing areas on an average daily basis totaled 82.0 million pounds or 1 percent above the 81.3 million pounds in April a year ago. April sales, however, were 5 percent below March 1962. Cumulative sales for the first 4 months of the year were 1 percent above the comparable period a year ago. The average milkfat test of whole milk sold in March, at 3.55 percent, compares with the year earlier test of 3.56 percent.

Skim milk sales in March 7 percent above last year

Average daily sales of skim milk in 73 areas during March were 7 percent above the same month last year and 4 percent over February 1962. Of the 10 most important market groupings, sales were lower than in March last year only in New Jersey, where the decrease was 5 percent. Increases varied from 2 percent in both Southern Michigan and California to 11 percent in the group of 3 Northern Ohio markets. First quarter sales were 7 percent above the comparable period of 1961. The average milkfat test of skim milk items in March at 1.16 percent compared with the average test a year earlier of 1.13 percent and the February test of 1.14 percent.

Sales of milk and cream mixtures for March up 1 percent

March daily average sales of milk and cream mixtures (half-and-half) in 68 markets were 1 percent greater than a year earlier and 3 percent above the previous month. Sales patterns were mixed. In the Chicago marketing area, March sales were 4 percent below a year earlier levels. In Southern Michigan, March sales were 1 percent above a year earlier; California sales were 2 percent less than March 1961. These three marketing areas together comprise about one-third the total for 68 markets. Sales in other markets in the aggregate were 2 percent above February 1962, and 3 percent above March 1961. Cumulative sales for the first 3 months of 1962 were slightly above the comparable period of last year.

Fluid cream sales 1 percent below last year

Sales of fluid cream (other than mixtures) in 69 areas for the month of March on a daily average basis were 1 percent under March last year, but were 4 percent above a month earlier totals. Of the 42 market groupings shown in the table, 18 registered increases over a year earlier. Sales in 22 of these groups experienced declines, but in 2 groups deliveries were unchanged. First quarter sales for 1962 in the 69 marketing areas were fractionally higher than a year earlier. The average milkfat test of cream sold during March in the 69 markets was 24.3 percent, 0.1 percent above February and 0.2 percent above March last year.

(Continued on page 27)

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
c. Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets - Louisville-Lexington-Ohio Valley, Paducah; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Spring-Pueblo and Western.

(Continued from page 20)

March sales of all fluid products 3 percent higher

On an average daily basis, total fluid sales in 72 marketing areas during March were 3 percent above both March 1961 figures and February 1962 totals. Compared with March last year sales showed increases for all market groupings except the Niagara Frontier and Wilmington Del. markets which were unchanged and 5 market groups which were lower. Jan.-Mar. 1962 total fluid sales in the 72 markets group were 2 percent above year earlier levels. The average milkfat test of total fluid products for March was 3.66 percent, down 0.02 percent from March a year ago, but unchanged from February 1962.

Average daily receipts 5 percent above April 1962

Average daily receipts of milk during April in 76 Federal Order and 5 State marketing areas were 5 percent higher than in the comparable period of last year. Receipts per producer during April, at 813 pounds, were 64 pounds or 9 percent above a year earlier. The average milkfat test for April receipts was 3.67 percent compared with 3.68 percent in April a year ago.

May milk production 1 percent above year earlier output

Milk production in the United States during May is estimated at 12.5 billion pounds, 1 percent above May last year and slightly above the 1951-60 average for the month. May is usually the top month in milk production for the country as a whole but the seasonal peak is now less pronounced than in earlier years. For the first 5 months of the year, milk production totaled 2 percent more than in 1961. Per capita production during May averaged 2.18 pounds daily, compared with 2.19 pounds a year earlier.
